Special Features
• Touchless hall technology
• 2 part design, mechanically decoupled
• High protection class, IP67, IP68, IP69
• Resolution up to 12 bit
• Wear-free
• Temperature range -40 °C up to +125 °C
• Single and dual-channel versions
• Optimized for mechanical engineering and mobile applications
• Competitive price / performance ratio
• Extremely flat design
• Customized versions available on request

Applications
• Manufacturing Engineering (textile machinery, packaging machinery, sheet metal and wire machinery)
• Medical Engineering
• Mobile working machines (industrial trucks, construction machinery, agricultural and forestry machinery)
• Marine applications

The sensor utilizes a contactless magnetic technology to determine the measured position. A separate magnet or magnetic position marker is attached to the moving element to be measured. The orientation of the magnetic field is measured and an analog voltage representing the stroke is the output signal. The touchless position sensor TFD-4000 is ideally suited for positioning in measuring ranges from 0… 5 to 0… 50 mm.

The very compact physical dimensions allow installation in small spaces. The housing is made of high grade temperature-resistant plastic material. The sensor is sealed and is not sensitive to dust, dirt or moisture.

The 2 part design, with the TFD sensor itself and its magnetic position marker, offers great flexibility when mounting.

The accuracy of linear magnetic sensors is strongly influenced by the installation space. Our many years of experience in development, production and application of magnetic sensors as well as our state-of-the-art simulation tools allow us to provide you with optimal designs to suit your applications.

Description
Material
Housing: high grade, temperature resistant plastic PBT GF with brass inserts

Mounting
With 2 pan head screws M4x14 (included in delivery)

Fastening torque of mounting
250 ± 50 Ncm

Electrical connection
Lead wires 0.5 mm² (AWG 20), PVC

Mechanical Data
Dimensions
See dimension drawing

Weight (w/o connection)
approx. 10 g
Ordering Specifications

Preferred types printed in bold

Supply voltage $U_b$
2: $U_b = 5 \text{ VDC}$

Output signal
1: $0 \ldots 95\%$ ratiometric to supply voltage $U_b$ (0.25 ... 4.75 VDC)

Output characteristic
1: Rising characteristic
3: Crossed outputs, channel 1 rising (partly redundant)
4: Crossed outputs, channel 1 rising (fully redundant)

Other output characteristics on request

Electrical connection
401: Lead wires, 3 x L = 0.5 m (single)
411: Lead wires, 4 x L = 0.5 m (partly redundant)
421: Lead wires, 6 x L = 0.5 m (fully redundant)

Other lengths and assembled connectors on request

Electrical measuring range
14: 0 ... 8 mm up to 0 ... 14 mm
24: 0 ... 15 mm up to 0 ... 24 mm
Other lengths from 0 ... 5 mm up to 0 ... 50 mm on request

Number of channels
6: One-channel version (1x supply voltage $U_b$, 1x output)
7: Partly redundant version (1x supply voltage $U_b$, 2x output)
8: Fully redundant version (2x supply voltage $U_b$, 2x output)

Series

Mechanical version
4021: Standard design

Accessories included in delivery
- 2x Pan head screws M4x14
If the magnet is located centrally to the sensor, the sensor is near the electrical center position. Direction of output characteristic with north pole alignment (color marking) or marking according to sketch:

Signal channel 1 falling, signal channel 2 rising when moving in direction of the electrical connection.

### Environmental Data

- **Max. operational speed**: Mechanically unlimited
- **Vibration** ISO 60068-2-6: 20 g, 5 ... 2000 Hz, Amax = 0.75 mm
- **Shock** IEC 60068-2-27: 50 g, 6 ms
- **Protection class** DIN EN 60529: IP67 / IP68 / IP69
- **Operating temperature**: -40 ... +125°C
- **Life**: Mechanically unlimited
- **Functional safety**: The sensor is not suitable for use in safety-related applications.
- **MTTF (IEC 60050)**: 7872 years (one-channel), 4441 years (partly redundant, per channel) or 4512 years (fully redundant, per channel)

### EMC Compatibility

- **ISO 10505 ESD (Handling/Component)**: 8 kV / 15 kV
- **ISO 11452-2 Radiated HF-fields**: 200 V/m
- **ISO 11452-3 Radiated HF-Fields, stripline**: 200 V/m
- **IEC 61000-4-2 Electromagnetic fields, Fast transient (burst)**: Level 5
- **IEC 61000-4-4 Cond. disturbs (HF fields)**: 10 V eff.
- **IEC 61000-4-8 Magnetic fields**: 30 A/m

FS = Full scale: Signal span according to electrical measuring range

**Available on request**: SPI or PWM interface

Position Markers

Z-TFC-P03
Magnet for direct application onto customer's shaft (see user manual).
We recommend mounting on non-magnetizable materials, otherwise the specified working distances will vary (e.g., reduction of approx. 20% with axial mounting on a magnetizable shaft).
Measuring range 0 … 8 mm up to 0 … 14 mm
Working distance Single channel 0.7 ± 0.5 mm, redundant 0.3 ±0.5/-0.3 mm
Permitted lateral offset ±1 mm
Operating temp. -40 … +125°C
P/N 400104225 Pack. unit [pcs] 1

Z-TFC-P04
Magnet for direct application onto customer's shaft (see user manual).
We recommend mounting on non-magnetizable materials, otherwise the specified working distances will vary (e.g., reduction of approx. 20% with axial mounting on a magnetizable shaft).
Measuring range 0 … 15 mm up to 0 … 24 mm
Working distance Single channel 2.5 ± 0.9 mm, redundant 2 ± 0.9 mm
Permitted lateral offset ±1 mm
Operating temp. -40 … +125°C
P/N 400104226 Pack. unit [pcs] 1

Z-TFC-P30
Position marker for frontal fixation with 2 cylinder screws M3x8 (included in delivery).
Measuring range 0 … 8 mm up to 0 … 14 mm
Working distance Single channel 0.7 ± 0.5 mm, redundant 0.3 ±0.5/-0.3 mm
Permitted lateral offset ±1 mm
Material PBT-GF
Operating temp. -40 … +125°C
P/N 400106758 Pack. unit [pcs] 1
400106757 25

Z-TFC-P31
Position marker for frontal fixation with 2 cylinder screws M3x8 (included in delivery).
Measuring range 0 … 15 mm up to 0 … 24 mm
Working distance Single channel 2.5 ± 0.9 mm, redundant 2 ± 0.9 mm
Permitted lateral offset ±1 mm
Material PBT-GF
Operating temp. -40 … +125°C
P/N 400106760 Pack. unit [pcs] 1
400106759 25
The accuracy of linear magnetic sensors is strongly influenced by the installation space. Using the latest simulation tools, we are able to design the measurement system optimally for your application. In order to select the best suitable magnet for your requirements please contact us. Between magnet / sensor unit and surrounding magnetic or magnetizable materials a minimum distance of 12 mm must be ensured. If this is not possible, the accuracy of the system will be affected and the data have to be verified.
Connecting Options on request

**M12 connector**
- Customized lengths
- 3-, 4-, 6- and 6-pole versions
- Protection class IP68
- Ordering codes of standard versions see ordering specifications

**Tyco AMP Super Seal**
- Pin- and bushing housing
- Customized lengths
- 3-, 4- and 6-pole versions
- Protection class IP67
- On request

**Deutsch DTM 04**
- Pin- and bushing housing
- Customized lengths
- 3-, 4- and 6-pole versions
- Protection class IP67
- On request

**ITT Cannon Sure Seal connector**
- Customized lengths
- 3-, 4- and 6-pole versions
- Protection class IP67
- On request

**Molex Mini Fit jr.**
- Customized length and lead wires
- 3-, 4- and 6-pole versions
- On request
The specifications contained in our datasheets are intended solely for informational purposes. The documented specification values are based on ideal operational and environmental conditions and can vary significantly depending on the actual customer application. Using our products at or close to one or more of the specified performance ranges can lead to limitations regarding other performance parameters. It is therefore necessary that the end user verifies relevant performance parameters in the intended application. We reserve the right to change product specifications without notice.
